OVERVIEW

PhD student in Artificial Intelligence at Shahid Beheshti University, researching reinforcement learning and multi-agent systems. Holds a master's in Software Engineering from the University of Tehran, with Erasmus experience at Mälardalen University (Sweden). Strong background in Cyber-Physical Systems, Real-Time Systems, Machine Learning, and Secure Distributed Architectures. Developed a high-grade thesis on blockchain-based monitoring for wireless sensor networks. Proficient in Python, Java, and machine learning frameworks with hands-on experience in research and industrial projects.

RESEARCH INTERESTS

- Federated Learning
- Reinforcement Learning
- Neural Networks and Deep Learning
- Multi Agent Systems

EDUCATION

Artificial Intelligence, PhD - 2026

Shahid Beheshti University
Research Field Reinforcement Learning - Multi Agent Systems

Software Engineering, Master - 2023

The University of Tehran - **GPA:** 15.13/20
Thesis Distributed Real-Time Monitoring: Using Blockchain for Consensus and Quality Assessment
(achieved highest grade with distinction)
Achievements
- Awarded Erasmus+ ICM scholarship for academic exchange studies (2023)

Computer Engineering, Master's Exchange Studies - Spring 2023

Mälardalen University
Coursework Artificial Intelligence - Software Development for Real-Time Systems

Computer Engineering, Bachelor - 2019

The University of Tehran - **GPA:** 16.32/20
Thesis Smart Advertising with Indoor Positioning System

ACADEMIC EXPERIENCE

Education Supervision / Dec 2024 - Oct 2026

General Directorate of Supervision, Evaluation, and Quality Assurance of Higher Education of Tehran Province - Tehran, IR

- Conducted multiple visits to universities and research institutes to assess the academic and research environment.
- Evaluated the performance of higher education institutions for the purpose of license renewal and upgrades.
- Monitored institutions to ensure compliance with regulations and prevent any violations of legal frameworks.
- Prepared detailed performance reports on universities and research institutes for submission to the Ministry of Science, Research, and Technology to support decision-making processes.
- Held meetings with university executives, founding board members, faculty members, and students.

Higher Education Supervision | Institutional Evaluation | Academic Performance Assessment

Summer Student / June 2019 - August 2019

IranEIT Company - Tehran, IR

- Developed and optimized SQL queries for database operations
- Frontend and Backend Development
- Conducted functionality testing to ensure website performance and quality
- Website: iraneit.com

SQL Java Web Development Wordpress

Teaching Assistant / 2016

The University of Tehran

- Assisted in teaching "Fundamentals of Computer and Programming" (Fall 2015).
- Developed lab instructions and weekly lab practicum structure.

Teaching

INDUSTRIAL EXPERIENCE

Software Developer / Feb 2019 - Jan 2021

Faraomran Negar - Tehran, IR

- Development of GIS-based applications for web and PC.
- Engaged in diverse responsibilities such as database query composition, Java development, and feature testing.
- Website: faraomran.com

Java SQL GIS

SKILLS

Programming Languages: Python, C++, Java, JavaScript, Bash
Markup Languages: HTML, CSS, LaTeX
Tools: PyTorch, Tensorflow, Keras, Pandas, Docker, Hyperledger Fabric, Git

ENGLISH TEST SCORE

IELTS | 7.5

Reading: 9.0 - Listening: 7.5 - Speaking: 7 - Writing: 7
Test Date: 11th December 2023

ONLINE COURSEWORK

Machine Learning

- Stanford CS229 (Machine Learning)
- Deep Neural Networks
- Deep Learning Specialization by Andrew Ng
- Machine Learning (Sharif University of Technology)
- Pattern Recognition (University of Tehran)
- PyTorch for Machine Learning

Mathematics

- Stanford Intorduction to Statistics
- Zurich Probability Course
